

Guido De Schepper

SystemConsultant / ProjectManager or Sales IntraLogistics:
Conveyors- / ASRS- / AGV-systems
Kapellen, Flemish Region, Belgium

Summary

With over 35 years of experience in intralogistics, packaging, and storage systems, I am a seasoned automation engineer and a trusted system consultant and project manager for various industries. I have extensive knowledge of automatic material handling, conveyor, sorting, order picking, AGV, robots, ASRS, storage racks, and packaging systems, as well as their mechanical, electrical, hardware, and software controls.

As the owner of my own consultancy firm since 2016, I have successfully delivered intralogistics solutions for multiple clients, such as 3PL-companies, AB Inbev, Coca Cola, Umicore, **VOLVO Cars**, **6Uffm7 U`YVUi hand Novartis**. I provide project management, advice, concept development, and solution specifications for material flow management, layouting, throughput, storage capacity, and material handling improvements and automation. I also have a strong network of intralogistics suppliers and users, and I have developed the business and distribution of AGV systems and material handling intralogistics projects in Europe. I am proficient in MS-Office applications, AutoCAD, and simulations, and I have excellent customer communication and presentation skills. My mission is to help clients optimize their internal logistics and material handling processes and systems with innovative and cost-effective solutions.
